

Athoi Moni Saha

B.E in Computer Science and Engineering |Chandigarh University

Email: athoisaha107@gmail.com (+917681947874)

CAREER OBJECTIVE

Aspiring Software Engineer and Project Manager with strong leadership and organizational skills. Passionate about managing technical events, coordinating teams, and driving impactful initiatives. Committed to building an active tech community while developing professional skills for a career in software engineering and project management.

WORK EXPERIENCE

Project Manager / Team Lead – College Projects | 2024–Present

- Led multiple academic and technical projects, managing planning and task allocation.
- Coordinated team members, tracked progress, and ensured on-time project completion.
- Handled project lifecycle from idea to final implementation while maintaining quality and teamwork.

Hackathon Participant – Zinnovatia Hackathon | 2025

- Collaborated in a team to design and develop innovative project solutions under time constraints.
- Applied problem-solving, coding, and teamwork skills in a competitive development environment.

PROJECTS

Kaloria – Nutrition Analysis Web App

- Developed a web application that analyzes food items and provides detailed nutritional information such as calories, proteins, carbohydrates, and fats.
- Integrated external nutrition APIs to fetch real-time food data and present it in a user-friendly interface.
- Implemented backend services for processing user input and storing analysis data.

Technologies: HTML, CSS, JavaScript, Python, MySQL.

Restaurant Website

- Designed and built a responsive restaurant website to showcase menu items and restaurant services.
- Implemented interactive UI components and smooth navigation for better user experience.
- Optimized layout for mobile, tablet, and desktop devices using responsive design principles.

Technologies: HTML, CSS, JavaScript

Bonsai – Gamified Pomodoro Productivity App (In Development)

- Developing a full-stack productivity application based on the Pomodoro technique with gamification elements.
- Implemented dynamic visual feedback where a virtual bonsai tree grows during focus sessions.
- Built backend services to store session data and track user productivity statistics.
- **Technologies:** HTML, CSS, JavaScript, Node.js, MongoDB

JavaScript Mini Game

- Developed a browser-based interactive game demonstrating JavaScript logic and event-driven programming.
- Implemented DOM manipulation and user interaction mechanics for gameplay.
- Designed a simple UI and game logic to improve engagement and responsiveness.
- **Technologies:** HTML, CSS, JavaScript

IoT Soil Monitoring System

- Developed a soil monitoring system using sensors to collect real-time environmental and soil data.
- Implemented microcontroller-based data collection for soil moisture monitoring.
- Designed the system to support precision agriculture and better farm management.
- **Technologies:** IoT Sensors, Microcontrollers, ESP-32, Arduino.

TECHNICAL SKILLS

- Programming: C++, C, Python, JavaScript
- Web Development: HTML, CSS, JavaScript, Node.js(basic), Express.js
- Databases: MongoDB, SQL
- Tools & Technologies: Git, GitHub, VS Code,
- Core Concepts: Data Structures & Algorithms, OOPs, DBMS, OS (basics)
- Practices: Agile basics, Project Management, Clear Communication
